

## General and veins surgery Genital Aesthetic Surgery (Labiaplasty)

### Description:

Contemporary trends and the effort to have a perfect body forces most women to look after those parts of body that are not even visible. However, the shape and size of breasts are not the only problems women can suffer nowadays.

Lately even the most intimate surgeries are being approached – plastic surgery of the labia. Labiaplasty is a surgical procedure that will reduce or reshape the labia minora. Labiaplasty is recommended to women who suffer from this imperfection and it causes difficulties to them. Such problem can considerably influence mental conditions and the self esteem of women.

### Technologies:

The surgery is done under local or total anesthesia. The redundant labia is removed by a surgical laser, the mucosa is stitched by special inner stitches that are absorbent and therefore do not have to be taken out. The intimate hygiene is very important after the surgery. The post-operative recovery is almost painless and thanks to the laser the labia and surrounding area might be swollen or slightly bruised.

### LASTING EFFECT:

Permanent

### ANESTHESIA:

Local / General

### STAY DURATION:

7 days
